

## Policy on communism

### How communism portrays its philosophy:

In political and social sciences, **communism** (from the Latin *communis* – meaning common, universal) is a social, political, and economic ideology and movement whose ultimate goal is the establishment of a socioeconomic order structured upon common ownership and the absence of social classes, money and the state.

Communism includes a variety of schools of thought, which broadly include Marxism, anarchism and political ideologies grouped around both. All these hold in common the proposal that the current order of society stems from capitalism, and that in this system, there are two major social classes: the working class – who must work to survive, (the majority of society) and the capitalists (The minority) who profit from the majority through private ownership. They declare that the political, social and economic conflict between these two classes will trigger a fundamental change in the economic system, transforming society. The primary element which will enable this transformation, according to this thinking, is the communal ownership of the earnings of production. (1)

**But Really Communism:** Enslaves the entire population, and rules through fear. It destroys property rights yet reshuffles private property to be in some degree redistributed to the People, while the rest is taken possession of by a new class or the Elite, who will own and manage it so as to establish absolute power.

Lenin adopted a theory on Capitalism, which was contrary to other views; he believed that the people's dictatorship would not take root in the advanced Capitalist societies but in the backward regions of the Czarist Russia.

Lenin believed that mass Movement and the strong and disciplined structure of the party would be the core strategy to establish dominion.

Currently in the West we are witnessing a revival of Communism combined with Islamism. Obama, who was elected on behalf of a netter social justice has defected on promises to keep the American Heritage by upholding the Christian faith, and in reality appears to be a Cultural Marxist Statesman, allied with Islam if not an Islamist himself.

### Communist trends in Australia are reflected by the Australian Communist Party: (2)

Some of their policies below are included here to give insight to the economic disaster and disintegration of our western establishments that we could expect if such a regime gained power.

- \*The right to strike to be incorporated in law – *A recipe for anarchy & bankruptcy.*
- \* A 35 hour week without loss of pay – *And who pays for this??*
- \* Indigenous workers' rights – *This is discrimination – why are they different to anyone else?*
- \*Union representatives on company boards elected by the workers
- \*Union run labour hiring halls and an end to labour hire companies'
- \*Unrestricted right of entry to workplaces for union officials.

*The above have the mark of totalitarianism – this is allowing the state the total right to make our decisions for us. Rise up Australia comments are in italic.*

## What does History show us of the Atrocities of Communism (3)

Christian apologist Gregory Koukl once wrote that, "the assertion is that religion has caused most of the killing and bloodshed in the world. There are people who make accusations and assertions that are empirically false. This is one of them." Under atheistic communist regimes, in which militant atheism served as the official doctrine of the state, Communist regimes killed **60 million** in the 20th century through genocide. It is estimated that in the past 100 years, governments under the banner of atheistic communism have caused the death of somewhere between **40,472,000** to **259,432,000** human lives. Dr. R. J. Rummel, professor of political science at the University of Hawaii, coined the term democide (death by government). Dr. Rummel estimates that communism caused the death of approximately **110,286,000** people between 1917 and 1987.

Nobel Prize winner Solzhenitsyn was asked to account for the great tragedies that occurred under the brutal communist regime he and fellow citizens suffered under.

His explanation:

"While I was still a child, I recall hearing the following explanation for the great disasters that had befallen Russia" ... 'Men have forgotten God; that's why all this has happened.'

Since then I have spent nigh 50 years working on the history of our revolution; ... I have read hundreds of books, collected hundreds of personal testimonies, .... contributed eight volumes of my own toward ... clearing the rubble left by that upheaval. But if asked today to formulate concisely the main cause of the ruinous revolution that swallowed up some 60 million of our people, I could not put it more accurately: 'Men have forgotten God; that's why all this has happened.'

### Our Policy:

\* Rise Up Australia Party would not include Communism as an Ideology that can be tolerated in Australia

As per all other totalitarian ideologies - secular or religious - Communism doesn't reflect the free nature of the Australian society as part of our Western Civilisation.

\* We would endeavour to have Communism (not to be confused with Socialism) outlawed as is what has happened with Nazism and Fascism.

This is a principle without discrimination which would apply to all totalitarian ideology and assignments hostile to our country.

Rise up Australia party would introduce into the school curriculum education on:

- The history of Communism and the current dangers to our western society.
- Atrocities committed by the Communist Governments.
- China under communism today – the hidden and barbaric system enforced by the State and the negative affects it has brought on their society
